## Introduction

AfriForum's municipal audit aims to measure the quality of life and level of service delivery in the country's respective municipal areas. Municipalities are the level of government closest to people and provide many of the important services that people are dependent on to survive and thrive, for example water and electricity provision, and road maintenance. However, this level of government in South Africa is to a large extent in a dilapidated and deteriorating state, thus affecting millions of people in the country. The additional aim of our audit is to provide an overall picture of municipalities, thereby continuously focusing the attention on the state of affairs within these municipalities and their residents. The report also serves as an informative tool for the public, the media, opinion formers, decision makers and administrators to understand their municipalities and apply pressure to bring about change where necessary.

The municipal audit examines the demographics, socio-economic conditions, service delivery issues and management of municipalities. Each report analyses the municipalities of a specific province, and each municipality is awarded an impression score out of 10. The follow-up reports on specific provinces also indicate which municipalities have improved and which municipalities have deteriorated when compared to the findings of previous reports. Previous editions comprised the municipalities in Gauteng, Mpumalanga and the North West province. The first edition of this audit dealt with South Africa's most densely populated province and economic hub, Gauteng. This report deals with the Western Cape, one of the wealthiest and certainly the best-governed province in the country.

## Demographics and socio-economy

- Population: 51 080 (49 586 in 2011)<sup>1</sup>
- Age distribution: 26,6% under 15; 66,5% between 15 and 64; 6,9% over 65<sup>1</sup>
- Education (20+): No schooling 5,4% (10,1% in 2011); matric 31,8% (23,6% in 2011); higher education 3,8% (6,5%)<sup>1</sup>
- Language (households): 81,7% Afrikaans; 10,4% Xhosa<sup>2</sup>
- Housing: 99,6% in formal dwellings (97,9% in 2011)<sup>1</sup>
- Unemployment: No recent data available

## Service delivery

- 77,9% of households have access to piped water inside their dwelling (81,3% in 2011).<sup>1</sup>
- The drinking water and effluent water have not recently been assessed by AfriForum and neither is there any other recent data available. Hence, no firm conclusions could be drawn.
- 95,3% of households have a flush toilet that is connected to sewerage (83,2% in 2011).<sup>1</sup>
- 96% of households use electricity for lighting (92% in 2011).<sup>1</sup>
- 91,7% of households enjoy weekly refuse removal (83,7% in 2011).<sup>1</sup>
- AfriForum did not recently assess Beaufort West's landfill sites and neither is any other data available.

## Management

- The Auditor-General's audit opinion for 2019/20 was *unqualified with findings*.<sup>3</sup> However, it is an improvement on 2018/19's opinion (*qualified with findings*) and even more negative opinions in earlier years.
- 29,9% of the budget was spent on salaries in 2018/19.<sup>4</sup>
- A negative cash balance of R33 112 948 was recorded at the end of 2018/19. This was a sudden and drastic deterioration on the previous years' cash balance.<sup>4</sup>
- Unauthorised, irregular, fruitless and wasteful expenditure comprise an enormous 256,2% of the operating expenditure.<sup>4</sup>

# Breede Valley Local Municipality

## Demographics and socio-economy

- Population: 176 578 (166 825 in 2001)<sup>16</sup>
- Age distribution: 29% under 15; 66,4% between 15 and 64; 4,7% over 65<sup>16</sup>
- Education (20+): No schooling 2,6% (4,9% in 2011); matric 33,3% (24,9% in 2011); higher education 5,6% (8,3% in 2011)<sup>16</sup>
- Language (households): 73,2% Afrikaans; 15,5% Xhosa<sup>17</sup>
- Housing: 77,7% in formal dwellings (77,9% in 2011)<sup>16</sup>
- Unemployment: There are no recent statistics available. The last known official rate was 14,4% in 2011.<sup>16</sup>

## Service delivery

- 70,8% of households have access to piped water inside their dwelling (69,3% in 2011).<sup>16</sup>
- Worcester's drinking water as well as effluent were classified as clean by AfriForum in 2020.<sup>18</sup>
- 87,3% of households have a flush toilet that is connected to sewerage (83,5% in 2011).<sup>16</sup>
- 92,1% of households use electricity for lighting (88,3% in 2011).<sup>16</sup>
- 77,7% of households enjoy weekly refuse removal (75,3% in 2011).<sup>16</sup>
- Worcester received a score of 58% in AfriForum's 2021 landfill audit, down from 70% in 2020. The site in De Doorns fared poorly with 30%.<sup>19</sup>

## Management

- The Auditor-General's audit opinion for 2019/20 was *unqualified with no findings*. It is an encouraging sign that 2018/19's opinion (*unqualified with findings*) was turned around to resume a longer-term trend of clean audits.<sup>20</sup>
- 29,4% of the operating budget was spent on salaries.<sup>21</sup>
- A negative cash balance of R24 793 815 was recorded at the end of 2018/19. This was a deterioration on the previous financial years' cash balance.<sup>21</sup>
- The municipality recorded no unauthorised, irregular, fruitless and wasteful expenditure in 2018/19.<sup>21</sup>

## Service delivery

- 84,9% of households have access to piped water inside their dwelling (81% in 2011).<sup>55</sup>
- The drinking water in Still Bay was certified as clean by AfriForum for five years in a row (2016 to 2020). Although the effluent was classified as clean in 2018, it received no score in 2019 and contained more than 1 000 units of *E. coli* per 100 ml of treated sewage in 2020.<sup>58</sup>
- 91% of households have a flush toilet that is connected to sewerage (80,7% in 2011).<sup>55</sup>
- 98,3% of households use electricity for lighting (94,9% in 2011).<sup>55</sup>
- 74,4% of households enjoy weekly refuse removal (78,7% in 2011).<sup>55</sup>
- AfriForum awarded a score of 88% for the landfill site in Still Bay and 86% for the one in Riversdal in 2021.<sup>59</sup>

## Management

- The Auditor-General's audit opinion for 2019/20 was *outstanding*.<sup>60</sup> This is quite a severe indictment on a municipality that has maintained clean audits for many consecutive years, but it could be attributed to a dispute or COVID-19 constraints.
- 34,6% of the budget was spent on salaries in the latest financial year.<sup>61</sup>
- A positive cash balance of R220 688 761 was recorded at the end of 2018/19. This is a slight improvement on the previous years' cash balances and a sign of financial sustainability.<sup>61</sup>
- Unauthorised, irregular, fruitless and wasteful expenditure comprise 2,1% of the operating expenditure.<sup>61</sup>

## Conclusion

Judging by these statistics and especially compared to municipalities in other provinces, the municipalities in the Western Cape have been and remain among the best in the country. Although not measured everywhere in the province by AfriForum, the quality of drinking water and effluent is generally very good. The province also scored the highest number of clean municipal audits of all the provinces. Although still relatively high, unemployment is quite low compared with other provinces. High percentages of households have access to piped water in their dwellings, use electricity for lighting, live in formal dwellings and enjoy weekly refuse removal by their municipality. Municipalities in the province show improvement in their financial performance after regressions and this attests to responsiveness on their part – something that should be lauded in the context of municipal management in South Africa. Hence, five municipalities progressed to clean audits from the previous financial year.<sup>150</sup>

However, some disquieting matters must also be highlighted. Seven municipalities in the province had *outstanding* audits in 2019/20, although disputes and COVID-19 challenges admittedly played a role in this. Although the province's municipalities still achieved 14 clean audits, more than half were *outstanding* and/or *unqualified with findings*. Unauthorised expenditure totalled R195 million (albeit a significant reduction on the previous year) in 2019/20 while fruitless and wasteful spending amounted to R10 million. The City of Cape Town, which did not achieve a clean audit, alone incurred R669 million in irregular expenditure (which totalled R1,4 billion, down from R2,6 billion in 2018/19). The Auditor-General said in her report that the province's municipalities have “good financial accounting controls, but inadequate preventive controls on compliance”.<sup>150</sup> Concerns were also raised about large portions of irrecoverable debt in some municipalities that imperils their long-term sustainability. Beaufort West, Kannaland and Laingsburg are highlighted as municipalities that require special intervention.
